Nathanael Sjaklif

Junior Laboratory Assistant @ BINUS University | Computer Science Student

West Jakarta, Jakarta, Indonesia

Summary

As a Junior Laboratory Assistant at BINUS University, I combine my passion for technology with hands-on problem-solving to support our academic community. My role involves leveraging a diverse skill set—including Node.js, OOP, Go, Python, SQL, and cloud technologies—to develop practical solutions that enhance learning and research.

Currently pursuing my Computer Science degree (expected 2027), I'm committed to merging theoretical knowledge with real-world applications—whether through assisting students, optimizing lab tools, or contributing to open-source projects.

Let's connect if you're passionate about tech, education, or collaboration! Always open to discussions on software development, cloud computing, or academic innovation.
